

TERRAN ORBITAL™

**LAUNCH
SERVICES**

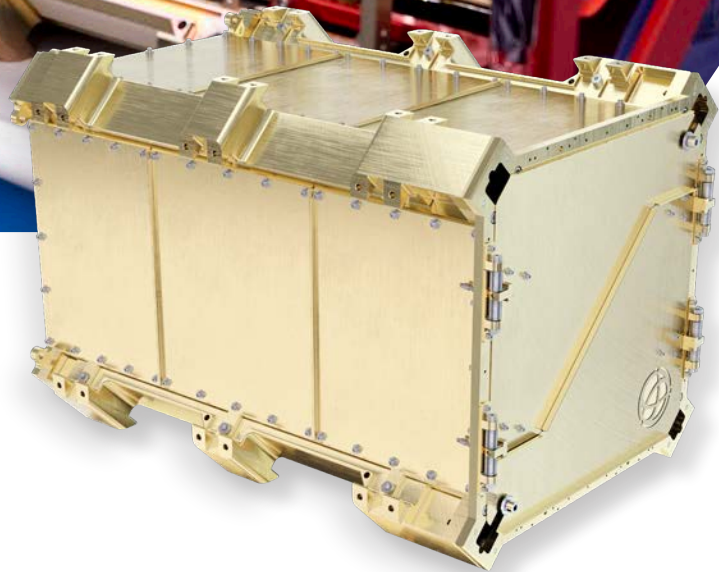

Terran Orbital leverages over a decade of experience (and longer if including experience of staff) to provide launch services to the entire space community for spacecraft built in-house or elsewhere. The Launch Systems Engineering department has extensive experience in all aspects of launch services, including launch agreements and launch vehicle integration.

SERVICES AVAILABLES

Terran Orbital provides full, partial (launch support without integration), and cafeteria-style service to assist you in your launch.

- Brokering of launch accommodation
- Provision of engineers during integration campaigns
- Documentation for rideshare providers (SSCMAN 91-70, MSPSP, others)
- Designing mechanical and electrical ground support equipment
- Providing interface control documentation and verification
- Handling all logistics and transportation
- Conducting integration at the launch provider's site
- Executing agile launch services

SUMMARY OF EXPERIENCE

Terran Orbital experience with both rideshare and dedicated missions gives you the confidence that we can get the job done!

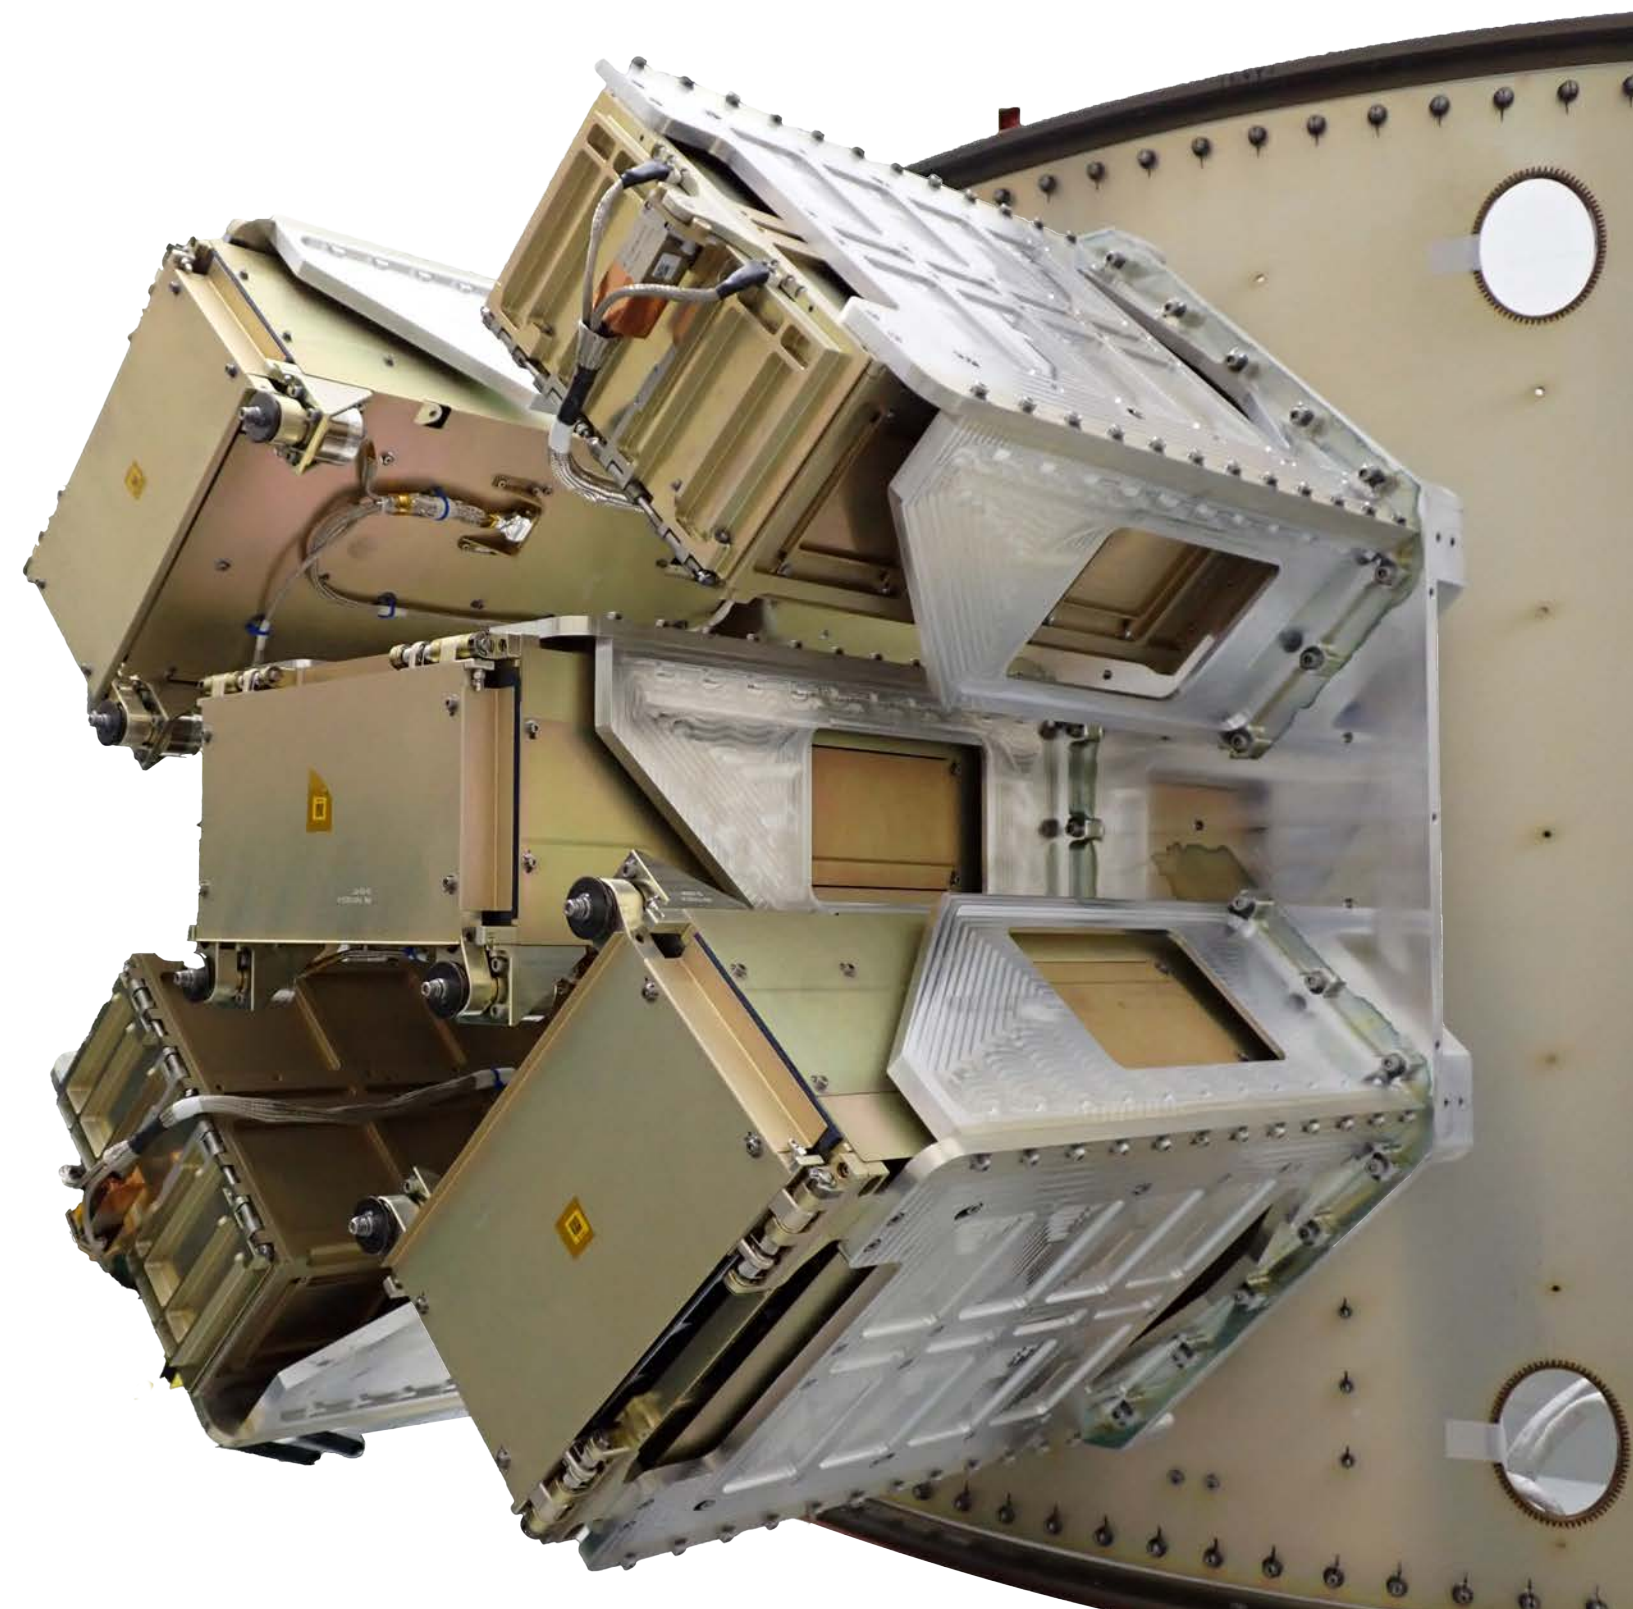

- 30+ Launches supported
- Partnered with 16 Launch vehicle providers such as:
 - Arianespace Ariane 64
